

Automated Reporting Solutions, Designed and Delivered.

Alteryx + Continuous Reporting Solutions for the Financial Services Industry.

Reduce manual report generation efforts and scale automated reports across your departments with Alteryx and Continuous Technologies. Alteryx is an analytic platform that allows users to easily access, transform, analyze, and output data, especially in the form of automated reporting. Continuous partners with Alteryx to resell, train, and enable users with the automated reports the Financial Services industry needs with workflow-specific knowledge and advanced technical expertise.

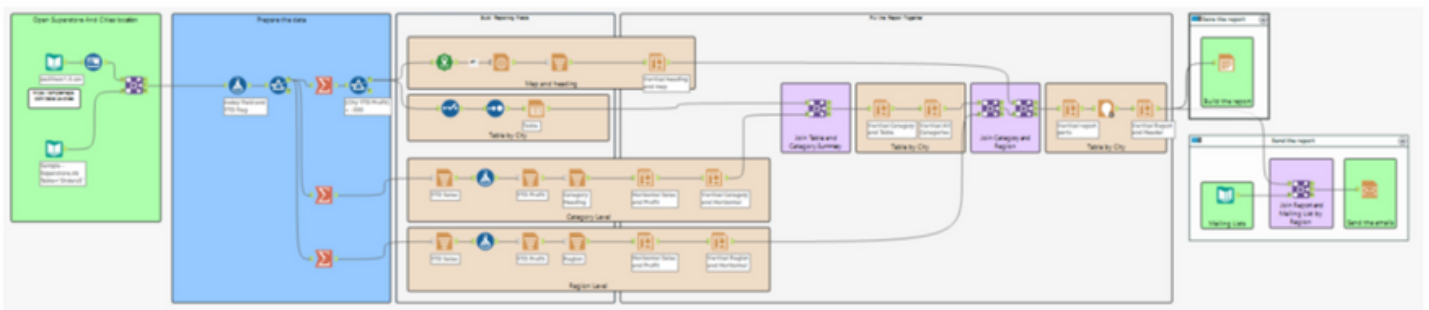

Whether it's for Fund Factsheets, Custody Support, or M&A Reports, Continuous Technologies can implement and configure custom reports and automation workflows for your firm.

Continuous Technologies is a data and analytics consulting firm serving the Financial Services industry. We are uniquely positioned as the trusted advisor and integrator that brings the Financial Services Data Cloud ecosystem together through our technical expertise, partnership, and core differentiator: industry expertise.

We deliver cutting-edge data strategy and design, as well as a team of certified technical experts to own the entire implementation and deliver comprehensive end-to-end solutions, tailored to your firm. Whether your firm needs to augment your technical team for a systems upgrade, do more with your data with Dashboards, or get fully operational in Snowflake in no time, Continuous is eager to enable your enterprise data.

Reporting Workflows
