**Continuus** TECHNOLOGIES

# FACTSET + SNOWFLAKE

**Elevate your access to FactSet's robust suite of proprietary and third-party content sets encompassing company, security, alternative, and event-driven content, historical time series data, managed benchmarks, and powerful portfolio analytics with Snowflake.**

As a Premier Snowflake partner and strategic FactSet partner, Continuus is uniquely positioned to help you maximize your investment in FactSet content sets through Snowflake. Whether you are new to Snowflake or a long-time customer, we can help you accelerate your time to value.

## Snowflake Setup and Configuration

**New to Snowflake and need help with the initial setup and configuration of Snowflake?** Continuus' experience onboarding clients that are new to Snowflake helps them get to production faster and without making the mistakes many new customers encounter.

## Change Data Capture

**Need to identify data changes from your FactSet data shares?** Continuus can help you set up a change data capture process to identify and process the data that has changed.

## Retire Cornerstone

**Looking to retire Cornerstone?** Continuus can help you migrate off Cornerstone and receive the same data through Snowflake data sharing.

## Migrate Off Excel Templates and Macros

**Are your FactSet Excel templates and macros brittle and hard to manage?** Continuus can help you consume the same data and apply the needed calculations and formulas through Snowflake.

## Portfolio Analytics

**Looking to simplify your portfolio analytics process?** Continuus can help you send and receive the necessary information required through Snowflake.

## Snowflake Data Sharing

**Need help setting up data sharing to receive or send data to FactSet?** Continuus has the experience and resources to make sure this is done right. Through our partnership, FactSet's data assets and APIs are more quickly accessible to clients, allowing for faster data consumption using tested patterns. Shared clients are able to leverage FactSet content and solutions across their enterprise.
